DETAILED ACTION

Status of Claims

1. This action is in reply to the amendment filed on 13 August 2009.
2. Claims 19 & 35 have been amended.
3. Claims 1-18, 20-34 & 36-40 have been canceled.
4. Claims 19 & 35 are allowable.
5. Examiner rescinds the 101 rejection to claim 35.

Allowable Subject Matter

6. The following is an examiner's statement of reasons for allowance: The instant application is directed towards forward spread trading. More specifically, Applicant claim at least one trade execution computer capable of executing forwards trades from forwards orders in the trading system, the at least one trade execution computer communicating with a plurality of user stations over a communications network; and a computer readable medium which stores computer programming executed by the at least one trade execution computer to cause the at least one trade execution computer to carry out a method for executing a forwards spread trade from the forwards orders in the trading system comprising a first leg forwards trade and a second leg forwards trade, and a price spread comprising the difference between prices of the first and second leg forwards trades the at least one trade execution computer at least automatically generating from the forwards orders in the trading system one of (a) a forwards spread order including a spread price representing a difference between prices of potential first and second leg forwards trades and (b) an order relating to one of the first and second leg forwards trades and a forwards spread order; the automatically-generated order not being initiated by a user station providing the automatically-generated order to the user stations; and in response to a request from a user station to execute the automatically-generated order, executing the forwards spread trade including executing the first leg forwards trade at the first price

Art Unit: 3695

and the second leg forwards trade at the second price, thereby providing the price spread between the first and second prices of the first leg and second leg forwards trades~ respectively. Furthermore, Sandhu discloses requesting price quotes, monitoring and reviewing quote requests, issuing price quotes, monitoring and reviewing price quotes, negotiation between users, acceptance of price quotes, reporting, portfolio management, analysis of financial information and market data, and communications among users via an automated processor. Potter discloses a system that automatically generates an offer in response to the customer's request based upon a number of parameters including the market price, the size and nature of the transaction and the size and nature of the client. If accepted, the trade is automatically forwarded for processing and assigned a reference number for tracking and control purposes. However, in the instant application none of the prior arts of record either individually or in combination teach or suggest automatically generating from the forwards orders in the trading system one of (a) a forwards spread order including a spread price representing a difference between prices of potential first and second leg forwards trades and (b) an order relating to one of the first and second leg forwards trades and a forwards spread order; the automatically-generated order not being initiated by a user station providing the automatically-generated order to the user stations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
